

# Liniuswood®

Aesthetic sun protection and façade decoration

## Liniuswood®

#### Introduction

Liniuswood® is a unique, patented concept which combines the quality of aluminium and the natural characteristics of timber in an aesthetic and contemporary system.

#### **Technical features**

- Blade type LW.01
  - Wood type: WR Cedar
  - Depth x height: 85 x 27mm
  - Pitch: 90mm (variable, greater pitch possible)
  - Slope: 60°
- Blade support LW.11
  - Material: POM UV-resistant (black or grey)
- Supporting profile
  - Sunclips® mullions SD.014 / SD.054 / SD.100, in aluminium, anodised or powder-coated

### **Unique features**

- Aesthetic and sturdy contemporary concept:
  - Mullions in aluminium guarantee good dimensional stability of the whole unit
  - Blades in timber lend the façade decoration a very natural and elegant appearance
- Simple and time-saving installation by means of clip assembly (blades can be removed, if necessary)
- Continuous, linear line of blades over each straight blade pitch thanks to the clip fixation
- Controlled warping of the wooden blade within the clip system
- Low-maintenance: high-quality timber, suitable for natural ageing

MIX FSC® C008551
